

IMPROVE YOUR HEARING.

ACOUSTIC
GEOMETRY™
BY ACOUSTICAL SURFACES

You might think your business is unaffected by how well your staff — and customers — can hear. But bad room acoustics interfere with clear communications. Worse, your customers' experience will be damaged.

You might not think you can easily, effectively, and affordably improve your acoustics. So you avoid it.

Change your thinking.

Our balanced, innovative products greatly improve sound in any room — easily, effectively, and affordably. We improve hearing.

Ted Weidman, ASI:

“Our conference room had so much sound bouncing around you couldn’t understand someone talking at the other end of the room. The panels made a big difference. Plus it’s easier to hear videos played on the TV. Great stuff!”

- A bar or restaurant can be uncomfortably loud.
- An open-plan office can be noisily distracting.
- A conference room can echo unintelligibly.

Bad acoustics will damage employee efficiency and ruin customer satisfaction. We've all heard bad-sounding environments and wondered why they weren't changed.

Acoustic fixes can look impossible to anyone who hasn't dealt with them. Where do you go for experienced recommendations for effective, affordable products?

Right here. Acoustic Geometry has decades of experience in applying the right solutions to improve sound problems. We have the world's best room treatments and noise control products, and we offer expert advice to help solve your sound issues.

Silk Metal Ceiling Tile

- A too-loud restaurant remedies noise levels with our Silk Metal Ceiling Tile Absorbers (easy-to-clean, cutting-edge technology) in a drop-grid ceiling.
- An office is quieted by hanging our Fabric-Wrapped Ceiling Cloud Absorbers.
- An echoing conference room has much better speech recognition with our design-friendly Curve Diffusors and Fabric-Wrapped Absorbers.

And they all benefit from our beautiful Acoustic Wall Art, offering sound absorption “hidden” in stunning graphics.

We've helped hundreds of businesses, from New York (we eliminated sound complaints in NYC's premier event center — see the back-cover photo), to Minnesota (we hushed a dental office for happier visits), to Texas (we supplied key components for a successful recording studio), to California (an overly-loud bar was quieted the right amount, retaining customer excitement).

The quality of acoustical products you select has a direct effect on the quality of sound reaching your staff and customers — and we offer the best available.

That's how we improve your hearing.
