

READ THIS BEFORE INSTALLING

Installation Instructions for your new Curve Diffusor

Step One: Preparing to Install

Measure the distance between the center of each bracket on the back of the curves. There are 2 brackets on the top and 2 on the bottom.

Step Two: Installing Z-clips to wall

A) Attach the first clip to the desired location on the wall with the raised edge facing up using the supplied drywall anchors and screws.

B) Using a bubble level and tape measure, mark the locations of the remaining clips. Ensure that the clips are level from one another. If installing on a concrete wall, we recommend using concrete anchors in the wall prior to installing the clips. Concrete anchors are not included.

Step Three: Hanging the Curve

A) Once all clips are installed, slide the Curve Diffusor down onto the wall clips. Check your work with a bubble level and ensure the fit is secure.

B) Adjust as necessary.

Your Curve Diffusor is now securely mounted to your wall and is ready to enhance your audio listening experience!

"This method can also be used to hang the Curve Diffusors horizontally.
